Product Approvals	IAPMO - NSF/ANSI 372, 42 & 53, cUL, CEC
Warranty	2 years (1 year Limited Warranty plus additional 1 year warranty is available on product registration)
CO ₂ Cylinder	2 x 1.5lb beverage-grade carbon dioxide cylinder
CO ₂ Capacity	Approximately 450 glasses of sparkling water per 1.5lb CO ₂ cylinder
CO ₂ Operating Pressure	Min 39psi - Max 43psi
Maximum Installation Distance (Tap to Command Center)	3'
Maximum Installation Distance (Tap to Command Center)	15"
Minimum Cabinet Depth	18"

Installation and connection of your HydroTap must be carried out by a qualified person, observing all local, state, & federal regulations. You will require suitable 110 -120V 60Hz 15 amp power supply with a NEMA 5-15 electrical outlet within 3' of the product. The HydroTap is a pump-driven system so the installation of the Tap must be within 3' of the base command center. The HydroTap is an air-cooled system so discrete cabinetry cut-outs are required for ventilation. Installation on most countertops is straightforward however some stone countertops may require a specialized cutting service. If using a drip tray (font) accessory, suitable drainage to a trapped waste is required within 3' of the installation. If you live in an area with hard water (more than 120ppm), we recommend installation of a scale filtration kit. Sufficient space and clearance to install the HydroTap as detailed in the product installation guidelines is required. Installation by Zip Professional Service can be arranged with a phone call to 1-833-233-2358 or through <https://us.zipwater.com>.
