## Tandem steam generator control kit

### K-5558

### Technical Information

All product dimensions are nominal.

Material: Plastic

### Notes

Install this product according to the installation guide.

**CAUTION:** Risk of personal injury. Do not install the User Interface Control outside the steam enclosure. The User Interface must be installed within the enclosure to allow the sensors to regulate the temperature and control the flow of steam.

**CAUTION:** Risk of scalding. Do not locate the steam head near a seat or bench, as the steam head is hot during operation and may scald the user if touched.

The temperature sensor should be mounted on the wall opposite the steam head. The steam head should be located as far from the seating area as possible.

Locate the steam head 6" (152 mm) above the floor and at least 4-1/2" (114 mm) from the threshold.
